TOXICOLOGY

Subject index of volume 135

Amino acids; Ammonia; Liver dysfunction; Liver perfusion; Thioacetamide (TAA); Ureagenesis **135**, 21

Ammonia; Amino acids; Liver dysfunction; Liver perfusion; Thioacetamide (TAA); Ureagenesis **135**, 21

Antioxidants; Free radicals; Lead intoxication; Neurotoxicity **135**, 77

Apoptosis; Bone marrow; DNA fragmentation; Gamma rays; PFC response **135**, 69

Aspartame; Ochratoxin A; Kidney; Protein binding; Renal cell lines **135**, 1

Bis(tri-*n*-butyltin)oxide; Cyclosporin A; Dot blot hybridisation; FACS; Lymphocyte transformation test; RT-PCR **135**, 49

Bone marrow; Apoptosis; DNA fragmentation; Gamma rays; PFC response **135**, 69

2-Bromopropane; Electrophysiology; Distal latency; Inhalation exposure; Motor nerve conduction velocity; Peripheral neurotoxicity; Histopathology **135**, 87

Carminomycin; Epirubicin; Idarubicin; Lipophilicity; Mitoxantrone; Non-toxicity area **135**, 11

c-src Knockout mice; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Differential toxicity; Liver triglyceride accumulation **135**, 95

Cyclosporin A; Bis(tri-*n*-butyltin)oxide; Dot blot hybridisation; FACS; Lymphocyte transformation test; RT-PCR **135**, 49

CYP1A1/2; CYP2B1; Cytochrome P450; Xenobiotic metabolism; Monoterpenes; Essential oils **135**, 33

CYP2B1; CYP1A1/2; Cytochrome P450; Xenobiotic metabolism; Monoterpenes; Essential oils **135**, 33

Cytochrome P450; CYP1A1/2; CYP2B1; Xenobiotic metabolism; Monoterpenes; Essential oils **135**, 33

Differential toxicity; c-src Knockout mice; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Liver triglyceride accumulation **135**, 95

Distal latency; 2-Bromopropane; Electrophysiology; Inhalation exposure; Motor nerve conduction velocity; Peripheral neurotoxicity; Histopathology **135**, 87

DNA fragmentation; Apoptosis; Bone marrow; Gamma rays; PFC response **135**, 69

Dot blot hybridisation; Bis(tri-*n*-butyltin)oxide; Cyclosporin A; FACS; Lymphocyte transformation test; RT-PCR **135**, 49

Electrophysiology; 2-Bromopropane; Distal latency; Inhalation exposure; Motor nerve conduction velocity; Peripheral neurotoxicity; Histopathology **135**, 87

Epirubicin; Carminomycin; Idarubicin; Lipophilicity; Mitoxantrone; Non-toxicity area **135**, 11

Essential oils; CYP1A1/2; CYP2B1; Cytochrome P450; Xenobiotic metabolism; Monoterpenes **135**, 33

FACS; Bis(tri-*n*-butyltin)oxide; Cyclosporin A; Dot blot hybridisation; Lymphocyte transformation test; RT-PCR **135**, 49

Free radicals; Antioxidants; Lead intoxication; Neurotoxicity **135**, 77

Gamma rays; Apoptosis; Bone marrow; DNA fragmentation; PFC response **135**, 69

Histopathology; 2-Bromopropane; Electrophysiology; Distal latency; Inhalation exposure; Motor nerve conduction velocity; Peripheral neurotoxicity **135**, 87

Idarubicin; Carminomycin; Epirubicin; Lipophilicity; Mitoxantrone; Non-toxicity area **135**, 11

Immune system; PAH; Occupational exposure **135**, 43

Inhalation exposure; 2-Bromopropane; Electrophysiology; Dis-
